

Trichomonas vaginalis Testing

Is *Trichomonas vaginalis* infection considered in the differential diagnosis?

Is the patient at risk for Trichomoniasis?

Yes

No

Is the patient symptomatic?

Do Not Test

This adds unnecessary expense,
and false-positives are likely.

Yes

No

**Choose the OSOM®
Trichomonas Prep Test
(TRICHO)**

This is the most cost-effective test in this setting.
The Aptima *Trichomonas* test is also an
acceptable option, but it is more expensive.

**Choose the Aptima *Trichomonas*
vaginalis Amplification
(TRVAMP)**

This is the most sensitive assay and recommended
for asymptomatic patients who may be infected
with *Trichomonas*.
